The First Term Test

The history of the Empire state building is filled with many interesting facts. It was designed by an American architect William land to become the tallest building in the world. Constructioned again in March 1930. Moreover, by October of the same year, 88 floors were already finished. In 1931, after 14 months and 25 million dollars the building's 102 floors were officially opened by US president .In 1964, buildings owners added colored lights to the top. The colors changed almost every night. Well, it is no longer the world's tallest building. It is still seen as a symbol of New York City and people from all over the world visit the building every year.
