Level: 2nd AM
Duration: 1/30 hour

English Examination N° 2

Deficiencies in nutrition cause diseases. Certain foods contain important substances. These substances improve the development of the body. Scientists called them "vitamins", meaning essential to life. Vitamins regulate the transformation of food into energy. Each vitamin plays a specific role. You find vitamin C in fruits and vegetables for example. It is important to have a balanced diet to be in good health.

Section One:
