Class : 3 MS3

Dridi Saadi Middle School

Third Term Test N^0 1 of English

Date :08/ 04/2018

Panda lives in the south central of China. It is a lazy animal .It feeds on bamboo trees and sometimes eats birds. Adult male measures around 1.2 to 1.9 m tall and can weigh up to 160 kg, panda has thick black and white fur. This mammal lives up to 20 years. It is a vulnerable species, so there are a few numbers living in China mountains. Because of the deforestation and pollution. Also people hunt them for clothing or decorative items.
