THE SECOND TERM ENGLISH EXAM

Jules Verne was a Frenchman who was born in 1828. He was neither an inventor nor a scientist, but he read great many scientific books. He had a very strong imagination and he loved adventure although he did not have many great adventures himself. He wrote a number of exciting books about the things which he thought that scientists and Inventors would one day be able to do. At that time, his stories seemed like fairy stories!

Many of Jules Verne's attempts to look into the future, however, were surprisingly accurate. For instance, one book was called From Earth to the Moon. In **this** three men and a dog made a journey around the Moon. They did this in a hollow 'ship' fired from a gun. After going round the Moon, they returned to Earth and splashed down into the sea not far from where the first real Moon travellers landed in July 1969, about a hundred years later!

Jules Verne's most famous book is" Twenty Thousand Leagues Under the Sea". This book has been made into a film. Perhaps you have seen **it**. In all his books Jules Verne used his scientific knowledge as well as his imagination in describing future inventions such as: the submarine or the space ship... Sometimes he was wrong, of course, but often the accuracy of his descriptions is very surprising.

Jules Verne died in 1905 when he was seventy-seven. Many years later, explorers really did go to the Moon and one part of the Moon was given Jules Verne's name.

Section One : Reading Comprehension:

1. Say If the following statements are True or False?

a. Jules Verne was a great adventurer ……

b. His books theme was science fiction ……..

c. His descriptions about the future were all correct ……..
