Class: 1TCL **April 2022**

Name:……

3rd term test

Read the text carefully then do the following activities.

Air pollution is actually the addition of any harmful substances to the atmosphere, **which** causes the damaging of the environment, human health and the quality of life.

With the development in industry, came along the increase in air pollution, which occurs inside homes, schools, offices even in the countryside. Consequently there has been an increase in the death rates resulting from various diseases caused by air pollution varying from breathing problem to lung cancer.

Air pollution does not only affect people but it also damages the whole ecological system in which plants and animals are harmed as well . Air pollution has reached such a critical stage where **it** affects the earth's atmosphere as it lets in more harmful radiation from the sun. consequently, our polluted atmosphere is becoming a better insulator, thus, preventing heat from escaping back into space. That is why there is a global rise in temperature which scientists refer to as 'Global Warming'-As a result of this rise in temperature the world food supply and sea level will be affected , also there is the probability of increase in the tropical disease.

1-Circle the letter that corresponds to the right answer.

- The text is about :

  a- Measures taken to fight air pollution.

  b- The causes of air pollution.
