Term 2 – Test	**Name:**
Class: 2ASLLE	

Read the text carefully then do the activities.

We live in the age of science. Science has brought about a lot of changes in the life of man. It is due to science that man is leading a comfortable and secured life. Technology is very important because it is used in all fields of life. Just consider your one-day routine and count all the technological products which you use in one single day and you will realize the significance of technology.

Artificial satellites, television, computers and robots are all the gifts of science. Most of the things we use in our life are the result of the inventions of science. Due to science the world has become smaller. Time and distance have been overpowered by science. We can reach distant places in a few hours. Even our domestic life has been changed by science, now we cook our food on gas stoves. Man has achieved great success by conquering space. In developed countries most of the domestic work is done by robot. Computer is the latent achievement of our scientist. In medical field also science has brought many changes. X ray machines and other gadgets help the doctors in revealing the inner portion of the body. Science is being applied in the agricultural fields. Through science we do not feel heat in summer and cold in winter. We can talk to our friends and relatives who are at a distance of thousand kilometers. Electricity is now used in place of coal. Chemicals are being used in fields. It can convert a desert into a fertile land. But science had also produced deadly weapons for mankind and therefore there is always fear of world war.
