Democratic and Popular Republic of Algeria

Ministry of education
Haddad Middle school.
Level: MS2

Second -Term Exam

Wilaya of Tizi-Ouzou.
School year:2018-2019.
Duration:90mn

Have you ever had the flu or "influenza"? If you have, you know how miserable it can make you feel. Most kids get the flu sometimes during their school years . When you have the flu, you usually have symptoms like: fever (which can be very high), have a cough, feel very tired, and may have a sore throat as well. It can make you feel sick for a few days or for as long as a week. Sometimes, it can be hard to tell if you have the flu or a cold, but with the flu, you usually have a higher fever and feel much worse. For most children, the flu comes and goes, but for some, it can be a serious illness.

Most children have the flu in winter because germs spread more easily when they are inside in settings such as classrooms. The best way to prevent from getting the flu is to wash your hands often, keep your hands to yourself, and go to your doctor for the flu shot or mist.
