Cyber bullying is the use of digital technologies with an intent to offend, humiliate, threaten, harass or abuse somebody. Cyber bullying is also any form of intimidation or any embarrassment caused by people online or through smartphones and tablets, social networking sites, messaging apps, and chat rooms such as Facebook, XBox Live, Instagram, YouTube, and Snapchat

In our recent National Bullying Survey, 56% of young people said **they** have seen others be bullied online and 42% have felt unsafe online. Cyber bullying can happen 24 hours a day, 7 days a week and it can take various forms. It can be a "harassment", **this** is the act of sending offensive, rude, and insulting messages or nasty and humiliating comments on posts, photos and in chat rooms, or being abusive. Also, it can be a "denigration" when someone may send information about another person **that** is fake, damaging and untrue. Sharing photos of someone for the purpose to ridicule, or spread fake rumours. Besides, it can be for a "flaming" end when someone is purposely using really extreme and offensive language to cause reactions and enjoy the fact it causes someone to get distressed. In addition, It can also take the form of impersonation when someone makes fake profiles or hacks into someone's email or social networking account and uses the person's online identity to send or post vicious or embarrassing material to or about others. Another form cyber bullying may take is "Cyber Stalking" **which** is the act of repeatedly sending messages that include threats of harm, harassment, intimidating messages, or engaging in other online activities that make a person afraid for his or her safety.
