People's Democratic Republic Of Algeria

The Second exam of English

Timing: 1h 30min **Level: 3ms**

Read the text carefully then do the following tasks:

Marie Curie was a polish physicist and chemist and one of the famous scientists at her time. Her real name is Marie Slodowska. She was born in 1867 in Warsaw, Poland. She studied physics in Sorbonne University in Paris, France. She worked with her husband Pierre Curie and discovered radium in 1890.

In July 1898, the Curies announced the discovery of a new chemical element, polonium. In 1903, she won the Noble Prize for physics together with her husband. When her husband died, Marie took over his teaching post, and became the first woman to teach at the Sorbonne. She received a second Nobel Prize, for Chemistry in1911. Marie Curie died in 1934 in France because of cancer.
