Third Term English Test 02

Sunday, April 29 th ,2018

Text: *Animals in danger*

*Many animals as: Tigers , bears , and fennecs are in danger of extinction. **They** have many natural enemies , but man is their principal problem. In many countries , man pollutes the air , seas and land with industrial wastes and chemical products.*

*People take land and food from animals when they build cities, factories and roads. People kill animals for their fur **which** is very expensive to make coats , shoes and bags , or for pleasure just to put them on walls for decoration.*

That's why governments have decided to establish special parks to protect these species from danger and live in security.
