The text:

Human life is divided into four periods. These are childhood, youth, adulthood age and elder hood age. All of these, childhood is the most interesting and unforgettable life events . Childhood memories are the thoughts of something that one had ever seen, done or experienced during childhood age. Every human has his own childhood memories. Me too, I have also some memories. Very often these memories are still reflected on my mind. At the age of my childhood my parents and I visited the zoo, the children's park, were wonderland and other interesting places. During my holidays I used to go to the beach. There I and my friends gathered shells and small sea stones. Sometimes we enjoyed time by building sandcastles. The first day of my school was perhaps the most important day in my life. My father took me to the nearest school and I was so excited because I had no idea about what was going on there. He took me to a room where few teachers were sitting and they asked me few questions. I was feeling awkward, but I answered all the questions. Then he registered my name and been admitted to school. I went to the class then and I got pleased a lot. This day is the best day of my childhood, I can't forget it.

All my memories were not joyful. I had also some painful incidents. The most painful one was the death of my grandmother. I will never forget her love and advice for me. However, past still always golden to us. It is difficult to forget the days of one's childhood. Childhood memories give us both pleasure and pain. We try to get relief in the past days of our childhood.
