اختبار الفصل الثّاني

Part One: Reading
Read the text carefully and do the activities:

In this study, we handed out a questionnaire to 32 Algerian students at Abou Dhar El Ghifari High School to achieve our goal of understanding **their** views on learning English. The participants were evenly distributed between genders. **(§1)**

Surprisingly, 90.62% of the students expressed positive feelings towards learning English. In contrast, only 28.12% showed a preference for French. The majority (71.87%) favored English over French, primarily due to **its** global importance. Additionally, most students (81.75%) found English easy, often saying it was because they hear it a lot. Moreover, 65.62% reported satisfaction with their teachers' methods, particularly enjoying interactive activities and multimedia resources. To enhance their English proficiency, many students mentioned using language learning apps like Duolingo, and listening to English podcasts. **(§2)**

In conclusion, the students we surveyed prefer learning English because they see its importance globally and find it easy. As the saying goes, "Knowledge is power." Similarly, understanding English empowers students, giving them the tools they need to discover the world and achieve their aspirations. **(§3)**
