Hidri Saleh Middle School **Level :MS4**

The third term English exam **Timing:1h30mn**

Text:

Children and teenagers all over the world use the Internet everyday.The most frequent uses are online games, looking for the information on subjects that are of interest or browsing for fun, looking for the information for schoolwork (reading books for the lessons, making reports, cheating, watching science-fiction films), communicating (instant messaging, having chats with friends, e-mailing), downloading (of music, films, games and etc.).

However, kids and teenagers need to learn to be responsible for **their** own behavior on the Internet with guidance from their families and communities. The main danger relating the use of the Internet to children is inappropriate access to information. They also risk "friendship" with strangers **which** can be dangerous for them.

Older people can also face some risks when using the Internet. For instance, people shouldn't put their personal information such as name and address online. Someone can invade their privacy without their knowledge. They should always be careful about their credit card when they do shopping online or pay for something because the credit card information can be stolen.

Therefore, we should be critical users of the Internet, because a lot of information on the internet comes from many sources and not all is reliable.
