| *Niveau :2ASL* | *Mars 2018* |
|---|---|
| *Second Term English Exam* | Duration :03h00 |

***Part one / Reading. (15 pts)***

***Read the text carefully then do the activities below.***

*Today, science fiction is widesppread due to the high level of technology and science. Film makers focus on imagination and futuristic themes in order to magnetize the attention of the viewers.*

*For instance, the directors of the "Matrix", Larry and Andy Wachowski focused strongly on the futuristic themes and life after nearly two decades. Larry declared: "After two decades, robots will do everything." Andy affirmed: "If we let the robots do everything, the human being will be dependent strangely enough, **he** becomes a hostage!"*

*Life is based on: "Speculation and experiments" i.e. the human being can't anticipate the results in such a domain, but he uses the experiment to determine the exact results or achievements. In Science fiction films, the director neglects a part of speculations and experiments; instead, he focuses on science accompanied by imagination and traps.*

*Of course, there is a big difference between "Realism" and"Imagination", but Man uses imagination only to escape from the brutality of life and **its** difficulties.*

***from the internet***

***A/ Comprehension and interpreting: (07pts)***
