TEXT

The Earth Day

Did you know that our planet has a special day? Every year on the 22nd of April, we celebrate Earth Day. We remind ourselves and others how precious the Earth is and how important it is to look after it.

Earth Day was the idea of the American Senator Gaylord Nelson who didn't want to see our planet suffer. Rivers and seas were getting dirty, many of our plants and species were becoming extinct. Therefore, he created a special day to take care of Earth. ***He*** started by writing letters to schools, to inform students and teachers about his complain. He hoped that young people around the country would react positively. Fortunately, ***they*** did!

As a result, in 1970, twenty million people around America celebrated the first Earth Day. People all over the country made promises to take care of the environment. Since then, Earth has been celebrated all over the world. Today, on Earth Day people organise events such as tree-planting excursions and clean-up. Now all of us must promise to turn everyday into Earth Day.
