Boughaba Rokia Middle School **School Year: 2022/2023**

The First Term Test of English

20

Text

The Museum of the Future (Arabic: متحف المستقبل) is an exhibition space for innovative and futuristic ideologies, services, and products. Located in the Financial District of Dubai, UAE, the Museum of the Future has three main elements: green hill, building, and empty spaces. Founded by the Dubai Future Foundation. It was set to open in 2021, but as of December of that year had yet to fully do so. The Government of the United Arab Emirates later opened the museum on 22 February 2022. The choice of the date was officially made because the 22nd of February 2022 is a palindrome date.

The goal of this museum is to promote technological development and innovation, especially in the fields of robotics and artificial intelligence (AI).

One of the world's most complex structures, the Museum of the Future was designed by Killa Design architecture studio and engineered by Buro Happold, a British professional services firm that provides engineering consultancy, design and planning.

The museum has seven floors dedicated to different exhibitions. Three floors focus on outer space resource development, ecosystems and bioengineering, and health and wellbeing. The other floors showcase near-future technologies that address challenges in areas including health, water, food, transportation, and energy, while the last floor is dedicated to children.
